

AGROECOLOGY 1st Co-funded Call

Annex IX

national/regional Funding Party regulations

Version 1.11, 02 July 2024

Call launch: 15 February 2024

Submission deadline pre-proposals: 26 April 2024, 2 pm CEST

Submission deadline full proposals: 19 September 2024, 2 pm CEST

Submission website: <https://agroecology.ptj.de/>

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or European Research Executive Agency (REA). Neither the European Union nor the granting authority can be held responsible for them.

Indicative budget	1,000,000 €					
Maximum funding per project	1,000,000 €					
Project duration	Min. 24 months			Max. 48 months		
Themes and topics to be funded	/					
Exceptions for funding of the research topics based on your national priorities	The projects must have a favourable impact on the Walloon economy and it should align with the priority of the regional Smart Specialization Strategy (S3 Wallonia).					
Link to funding programme and other relevant information						
Following partners are eligible for funding:						
Universities	Research institutes	Non-profit organizations	Consumer/citizens	Civil society representatives	Private companies	Other
x	x				x	
Any additional national/regional rules or documents or information						
Please indicate in the submission system in your partner profile from which Belgium funder you will request funds from. This is obligatory as three funders from Belgium participating in this call.						
Legal, administrative and financial conditions						
<p>The Walloon decree on RDI support (25/06/2008) is the Walloon legal basis to determine the funding of the participants. Participants must be based in Wallonia and the Walloon company(ies) must have a business unit in Wallonia. The companies have to present an innovative RDI project with a favourable impact on the Walloon economy and it should align with the priority of the regional Smart Specialization Strategy (S3 Wallonia). The participants cannot benefit from any other public funding for the same activities. The participants have fulfilled their obligations in the context of previous support allocated by the Region. The companies in difficulty, in accordance with the European legislation, cannot be funded. The participants must demonstrate their capability to carry out the tasks assigned to them in the project, exploit the results of the latter and have positive impacts on Wallonia from a socio-economic and sustainable development perspective.</p>						
Consortium configuration						

The Walloon partners of the consortium must include at least one company and the research budget of the Walloon partner company(ies) must correspond to at least 40% of the total budget of all Walloon partners.

Eligibility of costs

The eligibility of costs is in accordance with the guidelines issued the 8th October 2021 by the Service Public de Wallonie (SPW) available on https://recherche.wallonie.be/files/B_Je-dois-savoir/B2_Savoir-apres/Guide-des-d%C3%A9penses-admissibles_aides-g%C3%A9n%C3%A9rales_20211008.pdf

Maximum funding per project	187,500 €					
Project duration	Min. 24 months			Max. 36 months		
Themes and topics to be funded	Only Theme 1: Enhancing agroecology at farm level					
Exceptions for funding of the research topics based on your national priorities	Within this call, the Flemish Government/ Agency For Agriculture and Fisheries only subsidizes research that is situated within organic primary production.					
Link to funding programme and other relevant information	https://lv.vlaanderen.be/					
Following partners are eligible for funding:						
Universities	Research institutes	Non-profit organizations	Consumer/ citizens	Civil society representatives	Private companies	Other
x	x	x			x	
Any additional national/regional rules or documents or information						
Please indicate in the submission system in your partner profile from which Belgium funder you will request funds from. This is obligatory as three funders from Belgium participating in this call.						
SCOPE and objectives						
Within the AGROECOLOGY 1st Co-funded call, the Agency for Agriculture and Fisheries only subsidizes research that is situated within the organic primary production . Only research within Technology Readiness Level (TRL 4 up to 6) will be funded.						
All research in the context of this call must ultimately benefit Flemish organic farmers and horticulturists. The research must meet the legal conditions as imposed by the legislation regarding organic production in Flanders . If an exception is to be granted for research purposes, this must be discussed before submission of the pre-proposal with the Agency for agriculture and fisheries.						
Within this call following theme can be subsidized:						
<ul style="list-style-type: none"> ▪ Theme 1: Enhancing agroecology at farm level. 						
Theme 2: Implementing agroecology at the landscape level of the AGROECOLOGY 1st Co-funded call is NOT eligible for subsidy from the Agency for Agriculture and Fisheries.						

Project period

The minimum project duration is 24 months, and the maximum is 36 months. The earliest possible start date for projects recommended for funding is April-May 2025. All projects must be completed by 2028.

Projects can only start when the ministerial decree for the project is signed.

How much subsidy is given?

The Agency for Agriculture and Fisheries has provided a budget of 300 000 euros for this AGROECOLOGY 1st Co-funded call. The maximum funding per project is 187 500 euros.

The budget for the research projects must be drawn up based on the estimated real costs that will be incurred exclusively by the Flemish organizations and institutions. These costs must be proven based on a final statement after the end of the project. The projects are subsidized up to a maximum of 100% of the total project costs, except for overhead costs that are not subsidized.

The cost price of the project must be justified in relation to the expected result.

Funding modalities and Who can apply?

Unless otherwise stated in these regional terms and conditions, the rules as set out in the AGROECOLOGY 1st Co-funded call apply.

Flemish research institutions and Flemish educational institutions (universities and university colleges) without commercial objectives can apply for funding. Apart from these, other institutions and organisations (non-profit organizations and private companies including farmers) will be involved in the submission of the application and the implementation of the project; they are further on referred to as "Flemish partners".

It is imperative that one institution in Flanders is designated as the **applicant institution**. This is the institution member of the Project Consortium within AGROECOLOGY 1ST Co-funded call responsible for the realization of the **Flemish part of the project**. This institution is responsible for submitting the project proposal, carrying out the project and submission of payment applications. This doesn't imply, however, that this applicant institution is the coordinator for the whole Project Consortium within the AGROECOLOGY call.

The research should address real needs within the Flemish organic sector and focus on fundamental / applied research. Proposals should aim to connect fundamental research with operational solutions and innovation activities, integrating farmers' knowledge, or focus on applied research. Therefore, preferably a consortium is set up with practice centers. The collaboration increases the impact of the research and a successful implementation of the results in Flemish organic sector. The partnership with practice centers is maximum 30% of the total eligible costs. Non-profit organizations and private companies including farmers can be a subsidized partner in case they take up substantial tasks within the project to achieve the project objectives. This concerns therefore a project support that is spread over the entire project duration. The total budget for these partners does not exceed 10% of the total project budget.

Apart from the research institutions involved, cooperation with the non- profit sector, farmers, extension services,... is encouraged as to meet the project requirement of a multidisciplinary and integrated approach with a multi-actor perspective. For more information on the financial conditions, see section 6.

Before the project proposals are prepared, applicants are strongly advised to contact the Agency for Agriculture and Fisheries.

For submission of the preproposal, a detailed template is provided by the AGROECOLOGY 1st Co-funded call. A Dutch project application form will be distributed to the Flemish partners in projects that

received a favourable advice and positive recommendation for financing from the AGROECOLOGY Funder Board including the Flemish Government/ Agency for Agriculture and Fisheries.

Technical conditions

Research in organic farming

The projects are written, implemented, and monitored together with the organic sector, concerning both the practical applications and the more fundamental research aspects. Cooperation and partnership between the professional field (applied research centers, organic farmers' networks, etc.) and the submitting institutions is indispensable and a prerequisite for the project. Research in the context of these projects is preferably conducted on-farm.

To be eligible for participation, a certificate is required that the research proposal is supported by the organic sector (e.g. the report of a meeting with farmers, a list of signatures or a written agreement,...This should be made available when submitting the pre-proposal.

Key performance indicators must be listed in the application form.

Dissemination of results within Flanders

Within the project, the project plan must clearly state how the results of the project are being disseminated to the organic farming and horticulture sector concerned: to both farmers and horticulturists, to advisers and the government. This must be done during the duration of the project. The project is an open knowledge project, in which all results are disseminated in an open knowledge system.

All communications must display the logo of the Agency for Agriculture and Fisheries.

The final technical report and/or brochure must be made publicly available at least as a digital document.

Establishment of the Flemish steering group

The aim of this steering group is to collaborate within the Flemish context with as many actors as possible that are relevant for and active on the topic, to guide the project and to help disseminate the results about the Flemish organic agricultural and horticultural sector.

A proposal for the composition of the project steering group should be mentioned in the Dutch project application form, which will be sent after a favourable advice and positive recommendation for financing from the AGROECOLOGY Funder Board. The selection of the final steering committee is made in consultation with the responsible official of the Agency for Agriculture and Fisheries who monitors the project administratively and technically. Attention must be paid to the presence of a sufficient number of participants from the Flemish organic agricultural and horticultural sector, so that they are sufficiently involved and can provide feedback during the course of the project. At the latest one month after the starting date of the project, the responsible official is contacted to determine the date for a first meeting of the steering committee. At least 1 steering committee meeting is organized per year.

Communication with the government involved

All activities in the context of the project in which the Flemish partners are involved, both in-country and abroad, are reported to the relevant officials of the Flemish government who follows up the project administratively and substantively. They receive an invitation for the activities within Flanders. The coordinates of the people being notified are communicated at the start of the project period.

Financial conditions

General

The costs must be specified in detail per cost category (investment expenses, personnel costs, operating costs, outsourcing) in the application form. In the case of cooperation between several Flemish partners, this may have to be split per partner.

The division into cost category is important; at the time of financial settlement, shifts between the cost categories (investment costs, operating costs, etc.) are only accepted up to a maximum **of 10% of the total approved project amount**. These shifts must be motivated and requested in writing or electronically and must be approved by the Agency for Agriculture and Fisheries.

Only expenses incurred during the project duration are accepted, and for which invoices and proof of payment can be submitted.

Only the following expenses can be submitted:

- expenses related to activities that took place within the project period and
- expenses for which the date of the invoices or other accounting documents concerned, is within the project period, and
- expenses for which proof of payment of the effective payments can be presented. These payments must have been made either within the planned project period or at the latest 30 days after the end date of the project. Costs for which payment is made later are not accepted as eligible costs.

VAT can only be charged for the non-refundable part. Therefore, the current VAT status of the applicant must always be stated and substantiated at the financial settlement. In case of a mixed VAT status, the applicant must state what percentage of the VAT is recoverable.

Investment expenses

Investment costs are only accepted as costs if:

- made during the course of the project;
- contribute directly and demonstrably to the realization of the project;
- verifiable.

The depreciation period must always be stated and can be proven in the bookkeeping of the organization. The eligible cost is the depreciation cost during the duration of the project and proportional to the deployment of the equipment on the project. For example, if the investment was made in August and the project runs until the end of the year, then only 5/12th of an annual depreciation is acceptable.

In preproposal phase, investments can be listed as 'Consumables / Equipment' in the financial table of the preproposal template.

Personnel costs

A subsidized partner can deliver performance in a project in various ways; the following situations are distinguished:

- Situation A: the project employee is an employee in an organization/company
- Situation B: the project employee is self-employed

Situation A: The project employee is an employee within an organization/(private) company that is a subsidized partner of the project.

The employee is employed by an organization/company via an employment contract. The wage costs of staff members directly involved in the project can be included as personnel costs. Also the wage costs of personnel who provide specific services for the project, such as project accounting and project

administration are eligible. Indirect support staff as well as the wage costs for supervision are not included in personnel costs.

In addition to contractual staff, appointed staff (such as Independent Academic Staff and statutory staff), who contribute directly to the project and whose remuneration is charged to the general operating resources of research institutions and governments, can be financed on the project.

In this respect, the employer is obliged to ensure that the government does not double finance these persons for the same work. This can be done, for example, by means of a statement that they are replaced by others for their regular duties.

For the declaration of personnel costs, one must work by means of a standard hourly rate (SUT).

To calculate the eligible hourly rate, the following formula is applied: $\text{hourly rate} = 1.2 / 100 \times \text{gross monthly wage}$. The standard hourly rate for a staff member with a monthly gross wage of, for example, 3,500 euros is: $3,500 \text{ euros} / \text{month} \times 1.20\% = 42 \text{ euros} / \text{hour}$.

The gross monthly wage is in proportion to the required qualifications. The eligible standard hourly rate is limited to a maximum of 100 euros / hour.

The basis for calculating the standard hourly rate is the fixed gross monthly salary (without allowances, premiums, ... as these are included in the factor 1.2) as stated on the payslip of January (or the first full month after commencement of employment) of the calendar year in which the hours are performed. For staff members with a part-time employment contract, the full-time gross monthly salary is taken as the basis for calculation. If a staff member has several employment contracts, the basis for calculating the standard hourly rate is the total of the wage, unless the deployment in the project only relates to one employment contract.

The obtained standard hourly rate is then applied to the actual hours worked in the context of the project and applies to the entire calendar year. A new SUT is calculated in January of each year. An interim adjustment of the SUT is only possible based on a new employment contract.

If a person has other income, for example from part-time employment elsewhere, then the acceptable personnel costs can only relate to the remaining time. This means that a person with a full-time professional activity outside the project or a full-time replacement income cannot introduce personnel costs.

If a staff member works part-time on the research project and also part-time on other projects, also indicate how many and for which projects the other man-days of this staff member have been worked.

Situation B: Project employee is a self-employed person within a company that is a subsidized partner.

Farmers, advisors and other entrepreneurs (e.g. processors, distributors,...) who are a subsidized partner in the project through their company and who take up substantial tasks within the project to achieve the project objectives, can be compensated. Note that in case the self-employed person is a farmer and the related cost is lower than 3000 euro, this can also be included under 'Operating costs' (see 6.4).

In the event that the project employee is the manager of the company, he himself delivers the performance and he receives compensation through funds from his company. The project employee does not have a pay slip as a basis for settling their personnel costs. The costs for performance must be specified in terms of an hourly rate and number of man-hours performed. The eligible rate is limited to 120 euros/hour.

In general, for personnel costs (situation A or B):

- In the project application, you must provide a description of the estimated functions (project coordinator, researcher, worker,...) and the estimated staffing needed in the framework of the

project. In addition, you should estimate the number of days each member of staff will work on the project.

- In the reporting the hours worked for the project must be calculated per project employee and registered per day.

The following documents must be submitted with the interim and final reports:

- time registration: for reporting personnel costs, the hours worked for the project are recorded per staff member and per day. The reported project hours may not exceed the number of contractually performed hours for a month. Beneficiaries can rely on their own registration system. If such a registration system does not (yet) exist within the own organization, beneficiaries can rely on the template that is made available.
- if applicable, the January payslip for each year in which the employee participates in the project, or first full-month payslip if the employee was later employed or a pay statement from the social secretariat. This serves as proof of costs and as proof of payment.

With the standard hourly rate method, it is therefore not required to prove the real wage cost. The check will be made on the correct application of this method. Furthermore for situation B, a check will be made of the application of the limited rate of 120 euros/hour.

Kilometric allowances for assignments are included in operating costs.

Operating costs

Only operating costs that are directly related to the project and that are also verifiable are accepted as operating costs. In other words, it are costs and expenses that would not have occurred without the project. The following may be accepted as operating costs:

- the expenditures directly related to the project for consumables, supplies, raw materials and tools, the expected lifetime of which does not exceed the duration of the project;
- allowances to farmers: if less than 3000 euro subsidy, this can be declared under operating expenses under the respective partner; all costs incurred must be proven to be directly related to the project. If it concerns a fee for a time spent, the time spent must be demonstrated in detail. If an invoice is not possible (for the farmer), a cost statement claim can be included
- travel costs for project employee according to the project, to the extent that they do not exceed the amounts accepted for tax purposes (for car costs, the kilometric allowance is used as stated in the [annual circular letter](#) in the Belgian Official Gazette);
- rent to be paid to third parties for the use of buildings, premises, equipment and infrastructure, if this rent is necessary and directly linked to the project and for the relevant period of the project duration.

Internal invoicing is only **exceptionally possible** (e.g. for analyses in one's own lab), with prior request (with justification of the amounts, e.g. price list) and approval by the Agency for Agriculture and Fisheries. Internal invoicing is acceptable if:

- it concerns purely supporting supplies or services;
- the calculation is made at cost price (no margin); only the costs actually incurred are accepted;
- an internal invoice can be submitted;
- the billing department has complied with the law on public procurement.

The law on public procurement does not apply to invoicing of works/deliveries/services between purely internal departments of the same organization.

The following are not acceptable as operating costs:

- depreciation costs for the use of existing infrastructure (buildings, equipment, installations, furniture and rolling stock, etc.),
- expenditure related to distribution, marketing and advertising, unless explicitly stipulated and justified in the project application,
- rental to itself or "internal rental bill"; this is the charging of a rental price for making a building and infrastructure available,
- costs charged by educational or research institutions for the use of existing basic equipment when the beneficiary is the research institution itself.

Outsourcing

This category includes the costs of the services provided by external parties within the framework of the project (e.g. allowances for study, engineering and consultancy firms).

If the project applicant hires external services, this must be stated in advance in the **project proposal** or be **requested in advance** and must therefore be **approved**. Outsourcing category can only cover external services if it concerns services that the project partners themselves can not deliver. The project proposal or the application must specify in detail what the contracted performance entails. The invoice must also state in detail what the contracted performance entails. The rates must be in line with the market. When hiring external services, the law on public procurement must be complied with.

Overhead expenses

Overhead costs (e.g. electricity and heating costs of office space) are **not taken into consideration** for subsidies.

<p>Terms and conditions</p> <ul style="list-style-type: none"> Funding for Swiss partners in a AGROECOLOGY partnership consortia is granted according to national regulations, which are stated in the "Verordnung über die landwirtschaftliche Forschung vom 23. Mai 2012 (VLF; SR 915.7)". The planned research activities must be consistent with the Swiss legal regulations for research on Human as well as animal research and for genetically modified organisms (GMO). The project should be an innovative project. By applying a project, the researcher confirms, to his knowledge, that no similar projects have already be done or are in progress at a national and international level. If the oversubscription for Swiss partners exceeds the amount defined in the AGROECOLOGY consortium agreement, FOAG is entitled to selected the Swiss projects via a national selection. <p>Eligibility</p> <ul style="list-style-type: none"> Eligible are personnes working for a public and private research institutions as well as small and medium enterprises (SME), if they are legally established in Switzerland. This is also applicable for subcontractor (the subcontractor need to be clearly defined in the proposal) 						

Funding

- The overall funding amount for Swiss partners is CHF 750.000. The requested amount for Swiss partners in each application shall not exceed CHF 250.000.
- Due to budget organization, the Swiss project partner will receive the 1st payment part from the FOAG not before January 2025, even the project starts in 2024.
- Funding is limited to 75% of the total reported costs of the Swiss partner. The remaining costs must be covered by own resources of the applicant or by other funding bodies. The exchange rate is 1 CHF = 1 EUR.
- The funding will be granted as a global contribution, usually one third as an advance payment, one third as an intermediate payment after the midterm reporting and one third as a final payment after the final reporting. The formalities of each contribution will be regulated in a contract between the FOAG and the corresponding research partner(s).
- Additional funding will not be provided afterwards.
- Funding does not cover expenditures for activities carried out before the project has been granted.
- Swiss budget must be justified and clearly described in the proposal (e.g. in the partner information's part). Please contact FOAG to ask for the excel file- or click on the link [here](#).
- Budget for salary for permanent position in public institute (such as Agroscope and University) is not allowed. Budget for additional salary of part-time permanent position (i.e. Increasing the part-time or "percentage") can be increased to a maximum of 100%.

Following partners are eligible for funding:						
Universities	Research institutes	Non-profit organizations	Consumer/citizens	Civil society representatives	Private companies	Other
X	X	X			X	
Any additional national/regional rules or documents or information						
<ul style="list-style-type: none"> German applicants are strongly recommended to contact their National Contact Persons before submitting a proposal and to refer to the National Announcement (“nationale Bekanntmachung”) where all national requirements for funding are defined (https://www.bmbf.de/bmbf/shareddocs/bekanntmachungen/de/2024/03/2024-03-08-Bekanntmachung-Agroecology.html). Non-profit organisations have to contact the National Contact Persons to approve eligibility. The maximum funding per project is 700,000 €, however max. 500,000 € per German partner; only if a German project partner is the Coordinator of the transnational project, the maximum funding is increased to 800,000 €, however max. 600,000 € per German partner). BMBF funding of the 1st AGROECOLOGY call is provided as delineated in the national announcement “Förderung der <i>Agroecology</i> in landwirtschaftlichen Betriebssystemen und regionaler Landschaft” https://www.bmbf.de/bmbf/shareddocs/bekanntmachungen/de/2024/03/2024-03-08-Bekanntmachung-Agroecology.html. 						

- German applicants who are eligible to receive “Projektpauschale” must make sure, that this is drawn in the section “Finances” under “Overhead”. Additional explanations are to be added in the section “Comments on finances”. More information is available in the “FAQ zur Projektpauschale”:
<https://foerderportal.bund.de>
- Funding bases on §§23 and 44 BHO (“Bundeshaushaltsordnung”) and associated administrative regulations. The main items are as follows:
 - The procedure (“Verfahren”) is according to the above-mentioned protocol (see Chapter “Application Procedure”). Funding will be awarded as non-repayable project grant.
 - The funding regulations, the follow up and reporting of publicly funded projects are regulated according to the national announcement “Förderung der *Agroecology* in landwirtschaftlichen Betriebssystemen und regionaler Landschaft” and NKBF 2017, NABF and BNBest-mittelbarer Abruf-BMBF, respectively. Additionally, reporting duties as delineated in this Call Announcement in the Chapter “Project monitoring and meetings” must be respected as well.
 - Research institutions, which receive basic financing, can be funded subject to specific conditions.
 - **Private companies** must be registered in Germany and must be well established in Germany with plants, laboratories, employees, etc. The proposed project must be beneficial to the national economy. In order to prove their financial ability to participate in the proposed project, **Small and Medium Enterprises (SMEs)** have to submit the following documents to the contact person written below together with the electronic submission of the proposals (documents received latest on **26th April 2024**):
 - 1) Financial statements for the last two years (Jahresabschlüsse der letzten zwei Jahre)
 - 2) Confirmation of the financial own contribution (Erklärung zur Aufbringung des Eigenanteils)
 - 3) Business assessment (Aktuelle BWA)

The documents have to be submitted to:

<p>Name of & link to the funding programme and other relevant information: https://lbst.dk/tilskud-selvbetjening/tilskudsguide/groent-udviklings-og-demonstrationsprogram-gudp</p> <p>Institutional eligibility criteria: The funding from the Ministry of Food, Agriculture and Fisheries of Denmark for this call is under the auspices of the Board of the “Green Development and Demonstration Programme” (GUDP) and is administered by the Danish Ministry of Food, Agriculture and Fisheries. GUDP is a funding programme that aims to motivate and promote ambitious, innovative activities focussing on the green transition of the Danish agriculture, fisheries and food sector and therefore shall meet the needs of the respective industries. For further information please consult: https://gudp.lbst.dk/fileadmin/user_upload/GUDP/Filer/GUDP_Strategi_2023-2027_20042023.pdf https://icrofs.dk/fileadmin/icrofs/ICROFS_strategi_2023-2025/ICROFS_STRATEGI_2022_2025.pdf</p>						

Projects are subject to the rules and regulations of GUDP as specified in GUDPs general national guidelines.

Submission of an **additional questionnaire** prior to the preregistration deadline is mandatory for Danish applicants. **The Danish project partner has to send the questionnaire directly to the Danish contact person** (see contact details above).

Additional information:

For Danish applicants, the rules of GUDP prevail, but the international application- and budget templates have to be used; only in case of granted funding, a budget scheme including a Gantt chart for the Danish part of the work, and participant datasheets have to be submitted.

Applications for funding can be submitted by:

- Large, medium and small size enterprises (incl. other stakeholders such as independent institutions, private research organizations, and owners, tenants and users of farms)
- Research and other public knowledge institutes
- Technical Service Institutes (GTS) – are classified as companies
- Non-profit organizations

Funding from GUDP cannot be granted directly to foreign institutions or businesses registered outside of Denmark. However, those may participate as an external consultant to a Danish applicant.

AE call specific requirements for MFVM funding:

The Danish MFVM funding under this call gives priority to projects addressing research-based knowledge and technologies that support the continuous growth and development of the organic sector, and increase the credibility, sustainability, and contribution to public goods, of and from the organic sector.

Indicative budget	1,350,000 €	
Maximum funding per project	<p>One AEI applicant in the proposal: 175.000 €</p> <p>One AEI applicants in the proposal acting as Coordinator 275.000 €</p> <p>Two AEI applicants in the proposal: 250.000 €</p> <p>Two AEI applicants in the proposal with one of them acting as Coordinator: 325.000 €</p>	
Project duration	Min. 24 months	Max. 36 (preferably) months
Themes and topics to be funded	<ul style="list-style-type: none"> ▪ Research and innovation activities in all AGROECOLOGY topics in this call are eligible. ▪ Spanish investigators are strongly encouraged to include the Spanish industrial sector in the transnational consortia. Spanish Industrial partners can apply to CDTI (participant in the agroecology call) for funding. 	
Exceptions for funding of the research topics based on your national priorities	<ul style="list-style-type: none"> ▪ Mere diffusion, communication or other activities will not be eligible for funding. 	
Link to funding programme and other relevant information	<p>https://www.aei.gob.es/sites/default/files/page/field_file/2021-11/PEICTI_2021_2023.pdf</p> <p>The projects granted by the AEI must be aligned with the main objectives described in the Plan Estatal de Investigación Científica, Técnica e Innovación, and will be funded through the instrument “Proyectos de Colaboración Internacional (PCI)” 2025.</p> <p>Applicants are strongly encouraged to consult the PCI 2023-2 call text and especially the PCI requirements document on the national call website because they will be similar, as well as check their eligibility with the National Contact Point prior to the submission.</p> <p>Submission of proposals at the national level will be required at a later stage.</p>	

Following partners are eligible for funding:

Universities	Research institutes	Non-profit organizations	Consumer / citizens	Civil society representatives	Private companies	Other
x	x	Check with NCP				check with NCP

Any additional national/regional rules or documents or information

Example of maximum funding per project	CD (€)	CI (25%) (€)	TOTAL (€)
One AEI applicant in the proposal	140.000	35.000	175.000
One AEI applicants in the proposal acting as Coordinator	220.000	55.000	275.000
Two AEI applicants in the proposal	200.000	50.000	250.000
Two AEI applicants in the proposal with one of them acting as Coordinator	260.000	65.000	325.000

Additional amount of € 30.000 maximum (direct costs) can be requested per proposal if the work plan includes substantial experimental tasks to be carried out by the AEI applicants and which must be clearly justified in the budget.

Centers formed by different Spanish legal entities will be considered as a unique entity, and thus the maximum funding should not exceed the limits per proposal established above (for example, mixed centers).

The final funding will take into account the transnational evaluation of the collaborative proposal, the scientific quality of the Spanish group, the added value of the international collaboration, the participation of industry and stakeholders and the financial resources available.

Eligible Costs:

- Personnel costs for temporary employment contracts (PI contract excluded). The costs of permanent staff linked to the beneficiary entity or members of the research team will not be considered eligible costs.
- Direct costs such as current costs, small scientific equipment, disposable materials, travelling expenses, coordination costs, and other costs that can be justified as necessary to carry out the proposed activities.
- Overheads (25 % of all direct costs, including the subcontracting costs).

The AEI will avoid double funding and will not grant projects or parts of projects already funded through other national or EU calls.

- The eligible beneficiaries are non-profit research organizations (such as universities, public research institutions, technological centres and other private non-profit institutions performing RDI activities in Spain) which must comply with the requirements established by this transnational call and with the rules on eligibility defined in the corresponding Spanish national funding instrument "Proyectos de Colaboración Internacional" PCI and the [PCI requirements document](#).

The entities must have been previously beneficiaries of any of the AEI calls. They have to ensure contractual relationship with the Principal Investigator (PI) during all the implementation of the project.

Spanish Principal Investigators (PIs) must:

- Be eligible to the corresponding PCI (see [PCI2023-1](#) as an example) call [and the PCI requirements document](#)
- Demonstrate experience as investigators in projects funded by the Plan Estatal I+D+i 2013-2016, Plan Estatal I+D+i 2017-2020, 2021-2023, ERC Grants, European Framework Programmes or other relevant national and international programmes.
- Spanish PIs must have a contractual relation with the beneficiary covering the expected total length of the project (2025 – 2028).

Incompatibilities (these must be taken into account when participating in different transnational calls funded by PCI):

- PIs must remain unchanged between the proposal of this transnational joint call and the national PCI call should the proposal be recommended for funding.
- PIs will not be eligible for funding if applying in more than one proposal of this transnational call, in more than one proposal in the same PCI call and in PCI calls of consecutive years.
- PIs will be declared ineligible if they submit, as PIs or as coordinators, more than one preproposal to this transnational call, if they have submitted any proposal to another international call which may be funded through Spanish PCI calls in the same or in consecutive years, or if they have obtained a PCI project in the previous year. Financing of two PCI projects, with the same PCI, and in the same or consecutive years, is not allowed.
- **Important:** The applicants shall include the PI's full name and identification number as they appear in their DNI in the application form, as well as the full name of their institution in the original language and the CIF. The DNI and the CIF may be included in the same text box as their Family name and Legal full name of the research organization respectively.

It is very important to check the eligibility before sending the preproposal to avoid unwanted situations and damages to third parties.

Further requirements:

In addition to the national regulations, specific rules for the consortia may be applicable within the transnational call; please read carefully the Joint Call text and all the related instructions.

Important and mandatory acknowledgement: Any publication or dissemination activity resulting from the granted projects must be done in accordance with the publication requirements in the PCI 2025 call.

Data Protection: By submitting a grant application to the AEI, the applicants consent to communication of the data contained in the application to other public administrations, with the aim of further processing of the data for historical, statistical or scientific purposes, within the framework of the Organic Law 3/2018, of December 5, on Personal Data Protection and Guarantee of Digital Rights.

Centro para el Desarrollo Tecnológico y la Innovación E.P.E (CDTI)

National contact points

Name	E-Mail	Phone
Verónica Estruch Giner	veronica.estruch@cdti.es	+34 91 581 04 63 / 04 89

National regulation

Indicative budget	500,000 €					
Maximum funding per project	Non applicable					
Project duration	Min. 12 months			Max. 36 months		
Themes and topics to be funded	All topics					
Exceptions for funding of the research topics based on your national priorities	CDTI only funds activities that can be classed as industrial research or experimental development					
Link to funding programme and other relevant information	https://www.cdti.es/financiacion-nacional-sera					
Following partners are eligible for funding:						
Universities	Research institutes	Non-profit organizations	Consumer/citizens	Civil society representatives	Private companies	Other
					x	
Any additional national/regional rules or documents or information						
Eligibility of a partner as a beneficiary institution	For-profit enterprises (large or SMEs) established and carrying out RTDI activities in Spain. Other entities such as Universities, Public Research Institutions, Technological Centres, and other not-for-profit private institutions are not eligible.					
Eligible type of research and TRL	Applied research TRL: 4-7					
Submission of the (pre)proposal at the national level	Each Spanish company participating in a project and requesting funding from CDTI, must apply via CDTI's electronic submission system. CDTI's application process consists of completing an online application form (PAR application form) which is accompanied by a short technical report written in Spanish. The report must focus on the activities (and associated budget) that the company will assume in the project (please check Type of research funded and Eligible costs sections in this table). Applicants are strongly advised to check the detailed information available on CDTI website and to contact the NCP for advice about national funding rules, before submitting a proposal.					

Additional eligibility criteria for the funding agency	Please note that failing to comply with the national application process by the deadline, will deem the company ineligible to participate in the call.
Eligible costs	Projects should support transnational collaboration; therefore, no single participant or country can exceed 70% of the total project costs. Eligible costs: • Staff costs related to technical staff directly involved in the R&D project. Project management costs, max. 58 hours per month (approximately 0,4PM) • Instrument and equipment costs • Implementation costs e.g., technical knowledge, patents, or consultancy services, intended exclusively for the research project and procured from external sources at market price. • Other costs including goods and services to be used exclusively for the research project e.g.: (national) audit costs max EUR 2,000 per year/beneficiary, travel costs associated with the implementation of the project (EUR 8,000 max. for the duration of the project). • Overheads (indirect costs as a percentage of personnel costs) are calculated automatically by CDTI's electronic submission system.
Website with additional information	CDTI Website
Additional information	CDTI will only fund technology-based activities within industrial research and/or experimental development projects (in accordance with the definitions of the General Block Exemption Regulation, EC Regulation nº651/2014) representing outstanding scientific-technical quality and high innovative potential. Please note that non-technological activities e.g. developing new business models, are excluded from CDTI funding. R&D activities to be financed must be within the TRL 4-7 range and be implemented in Spain.

Consejería de Economía Ciencia y Agenda digital – Junta de Extremadura (JUNTAEX)

Regional contact point

Name	E-Mail	Phone
Cristina Gallardo Rey	cristina.gallardo@fundecyt-pctex.es	+34 6363 69896

Regional regulation

Indicative budget	200,000 €					
Maximum funding per project	200,000 €					
Project duration	Min. 24 months			Max. 36 months (preferable)		
Themes and topics to be funded	all topics					
Exceptions for funding of the research topics based on your national priorities	no					
Link to funding programme and other relevant information	The regional contribution will be co-funded with the European Regional Development Fund					
Following partners are eligible for funding:						
Universities	Research institutes	Non-profit organizations	Consumer/citizens	Civil society representatives	Private companies	Other
X	X	X		X	X	
Any additional national/regional rules or documents or information						
<p>Junta de Extremadura (JUNTAEX) will finance the activities to be developed by the Extremadura entities identified above as eligible partners for funding in the Autonomous Community of Extremadura.</p> <p>Eligible costs will be those directly related and strictly necessary for the implementation of the project activities and taking place within the project period.</p> <p>The categories of eligible costs in the case of Extremadura entities applying for regional grant will be the following: personnel costs necessary for the execution of the activity, costs of other goods and services directly related to the activities of the project, travel and depreciation of scientific and technological equipment.</p> <p>Indirect costs will be calculated as a percentage of 7% of the total amount executed.</p> <p>In the case of enterprises, the contribution of the Junta de Extremadura will be limited to industrial research or experimental development projects carried out by small and medium-sized enterprises in the Autonomous Community of Extremadura with the following specifications:</p>						

PROJECT	SMALL ENTERPRISE (%)	MEDIUM-SIZED ENTERPRISE (%)
Industrial Research (TRL 2-4)	80	75
Experimental Development (TRL 5-7)	60	50

Finally, the results of the project will need to be widely disseminated through conferences, publications, open access databases or free or open source software for access to these aid intensities for enterprises.

Non-profit organisations and public bodies will have access to an intensity of 100% of the eligible costs including indirect costs.

After the resolution of the international call for proposals, the Junta de Extremadura will initiate an award procedure with the Extremadura beneficiary entities that will include the specificities of communication, justification and payment of the grants.

The Regional Government of Extremadura will coordinate with the other Spanish funders for the efficient use of the resources allocated to Extremadura entities.

Applicants who want to submit a proposal are requested to contact agroecology@fundecyt-pctex.es as soon as the consortium is complete.

<p>The main national criteria emphasizes that the research & development projects shall benefit the agri-food livelihood by potential business innovation, otherwise no specific topic priorities in this call. MMM uses so called total cost model where funding for research organizations and universities covers 70 % of the project's gross eligible costs. For companies the maximum funding is 50%. Product development supporting individual companies will not be supported. The results of funded projects must be open for access by all potential user groups. Funding does not cover expenditures for activities carried out before the project has been granted.</p> <p>MMM urges all applicants to get in touch with the national contact person already in the early phase of the project planning.</p> <p>The general conditions of RDI projects funded by MMM: https://mmm.fi/tutkimus-ja-kehittaminen/lomakkeet-ja-ohjeet (in Finnish) Maa- ja metsätalousministeriön rahoittaman tutkimus-, kehittämis- ja innovaatiotoiminnan (TKI-toiminnan) vakioehdot (will be available also in English).</p>						

Agence Nationale de la Recherche (ANR)

National contact points

Name	E-Mail	Phone
Florence Jacquet	florence.jacquet@anr.fr	N/A

National regulation

Indicative budget	2,000,000 €					
Maximum funding per project	see details below					
Project duration	Min. 24 months			Max. 36 months		
Themes and topics to be funded	all topics					
Exceptions for funding of the research topics based on your national priorities						
Link to funding programme and other relevant information	https://anr.fr/fr/plan-daction-2024/					
Following partners are eligible for funding:						
Universities	Research institutes	Non-profit organizations	Consumer/citizens	Civil society representatives	Private companies	Other
x	x	x			x	x
Any additional national/regional rules or documents or information						
<p>Maximum funding per project</p> <p>The maximum amount that can be requested from ANR <u>by each proposal</u> with French applicant(s) is:</p> <ul style="list-style-type: none"> ▪ 400.000 € if the Coordinating Partner is requesting funding to ANR and is eligible for funding by ANR ▪ 300.000 € (for standard French Partners) <p>The minimum amount per beneficiary is 15 000€.</p> <p>If there are several French partners requesting funds from ANR, the total requested funding from ANR (300 000 €, extended to 400 000 € if the coordinating partner is requesting funding to ANR) must be split among them.</p> <p>For calculation of overheads, please check the ANR Funding Regulations for at: https://anr.fr/fr/rf/.</p> <p>Eligible Institutions</p> <p>ANR may fund research organisations and undertakings, as defined by the EC regulation on State aid for research, development and innovation (see the ANR Funding regulations for further reference). Only research organisations that have their primary establishment in France may be funded. As for</p>						

undertakings, ANR may fund those that have their real head office in an EU member State and an establishment (primary or secondary) in France.

In this call, to be eligible, the consortium must include at least one French public research organization (EPA, EPSCP, EPST, EPIC).

The involvement of an enterprise is encouraged but not mandatory. **If a non-French enterprise is involved in a project and requests funds from a funding organisation other than a French funding organisation, it is mandatory to involve a French enterprise; otherwise the French partners requesting funding from ANR will be declared ineligible.**

Partners from countries subject to sanctions applicable to the research field by the European Union authorities are excluded from this call for ANR. ANR will declare Partners requesting its support ineligible if they apply with Partners established in these countries. At the date of publication, these exclusions concern Partners from the following countries: Russia, Belarus. This list may evolve in case of new sanctions decided by the European Union.

See more information on the eligibility of institutions on the ANR Funding Regulations <https://anr.fr/fr/rf/>.

Eligible Costs

Please check the ANR Funding Regulations at: <https://anr.fr/fr/rf/>.

Additional eligibility criteria:

To be eligible, a proposal must not be deemed similar to another proposal still undergoing evaluation in another ANR call, or already funded.

Depending on the consortium composition, a Consortium Agreement may be mandatory for ANR at the funding stage for successful applications. Please refer to the ANR funding regulations for more details: <https://anr.fr/fr/rf/>

Regarding project partners' commitment:

- Access to genetic resources and traditional knowledge associated with genetic resources
- Ethics and scientific Integrity
- Publications and Open Science Policy
- Scientific, Technical and Industrial Culture
- GDPR
- "PPST"

Please consult the complete terms and conditions for French Partners on the ANR website for more details (Document "Modalités pour les Partenaires sollicitant une aide de l'ANR")

National Eligibility Criteria <ul style="list-style-type: none"> Grant applications will only be accepted from approved Irish RPOs (see section 4 of the Call Guidelines for Irish Applicants) 						

- The grant request by Irish RPOs must not exceed the maximum funding per project as set out above.
- Address at least one of the scientific areas related to the call scope (as set out in the central Call announcement/documents under the Agroecology First Co-funded Call)
- Avoid duplication of recent national and international research work already funded or ongoing that incorporates the scope of the scientific topic areas in the Agroecology First Co-funded Call.
- Closely align with relevant national policy and foresight documents including but not restricted to Food Vision 2030, IMPACT 2030, Programme for Government, Ag-Climate, Climate Action Plan 2024, and Sectoral Adaptation Plan for Agriculture, and also align with relevant strategic research and innovation priority areas and agendas.

Applications that do not adhere to these criteria will be deemed ineligible and in such cases the application will not proceed for expert review.

Eligible Funding Partners

Please note: Project partners that are not eligible for funding are encouraged on an in-kind or self-financing basis.

Teagasc Funding

It is not mandatory for Irish applicants to request grant-aid from both DAFM and Teagasc.

Where grant-aid is sought from Teagasc this must be stated clearly in the Budget Comments section of the pre-registration and full proposal application forms.

The grant-aid from Teagasc must be in the form of €124,000 for a four-year Walsh Scholarship-funded PhD – please refer to the ‘Funding Rules’ (Section 5) of the Guidelines for Irish Applicants and to the Teagasc website ([Teagasc Walsh Scholarship Programme](#)) for more details on how the Walsh Scholarship funding is structured.

Call Guidelines for Irish Applicants

Please see the ‘Call Guidelines for Irish Applicants’ located on the DAFM website which sets out in more detail the rules for Irish applicants seeking grant-aid from the Agroecology First Co-funded Call and **must** be read in conjunction with the requirements set out in this National Annex, the Call Announcement document and the Strategic Research and Innovation Agenda ([SRIA](#)) of the Partnership on Agroecology.

Further Information

Applicants should note that the discussions and decision regarding the eligibility of any Irish applicants to the Call or on the final selected projects is taken by DAFM only.

National regulation

Indicative budget	1,200,000 €	
Maximum funding per project	300,000 € The maximum requested funding by Italian applicants to Masaf per 1 project cannot exceed 300.000 €. Please, consider: <ul style="list-style-type: none"> ▪ One UO not acting as Coordinator: the requested funding to Masaf cannot exceed 140.000 €. ▪ One UO acting as Coordinator: the maximum allowed requested funding to Masaf cannot exceed 160.000 €. Coordination costs can be requested up to a max amount following the rules indicated in the User's manual 2023 (see below further details on coordination costs). 	
Project duration	Min. 36 months	Max. 36 months
	The eligible project duration is 36 month, shorter projects will be declared not eligible for Italian applicants.	
Themes and topics to be funded	All topics	
Exceptions for funding of the research topics based on your national priorities	The Italian applicants requesting funds to Masaf in this call must perform activities with expected outcomes useful in the wider context of the sustainable production not limited to the specific requirements of the regulated organic production.	
Link to funding programme and other relevant information	PSIR: https://www.politicheagricole.it/flex/cm/pages/ServeBLOB.php/L/IT/IDPagina/9065 Masaf - International call: https://www.politicheagricole.it/flex/cm/pages/ServeBLOB.php/L/IT/IDPagina/9079 User's Manual 2023: https://www.politicheagricole.it/flex/cm/pages/ServeBLOB.php/L/IT/IDPagina/19644	

Following partners are eligible for funding:						
Universities	Research institutes	Non-profit organizations	Consumer/citizens	Civil society representatives	Private companies	Other
X	X	X				
others	<p>National public and private no profit research institutions and universities. See details in User's Manual 2023 https://www.politicheagricole.it/flex/cm/pages/ServeBLOB.php/L/IT/IDPagina/19644</p> <p>No profit organization are eligible if research is included among main scopes of their statutory acts</p> <p>SMEs and organisations with other statutory nature are welcome as participants if an added value to the project is proven and if their costs are covered by their own or other external resources. Costs cannot be covered by Masaf.</p>					
Any additional national/regional rules or documents or information						
<p>General</p> <ul style="list-style-type: none"> ▪ In this call the beneficiaries eligible to be funded by the Autonomous Province of Bozen/Bolzano are not allowed to request funding to Masaf, they will be declared ineligible by Masaf. ▪ Italian applicants must specify in the submission system (proper box) they request funds from Masaf. ▪ Please note that the same person cannot be coordinator, participant or team member in more than one proposal. <p>Financing and cost eligibility</p> <p>In defining the eligibility for funding of project costs, national applicants must strictly refer to the regulations indicated in the standing User's Manual 2023 https://www.politicheagricole.it/flex/cm/pages/ServeBLOB.php/L/IT/IDPagina/19644</p> <p>The selected national institutions will be financed up to 99% of the eligible requested funding (<i>costo approvato</i> - in the national template- eligible for Masaf). The total requested funding (100%) must be indicated in the project financial section of the project proposal (see the submission tool) and must be consistent with all eligible costs which will be declared in the national financial forms (if the project will be selected).</p> <p>Eligible costs are defined as follows (for any item see User's Manual 2023 for details):</p> <p>A) Personnel</p> <p>A 1) Permanent personnel – no contribution if already paid with public funds; for private no-profit institutions permanent scientific staff can be reimbursed if not already paid with public funds.</p> <p>The cost of permanent personnel working in the project must be declared (as own contribution not higher than 30% of the total project cost) even if it will not be reimbursed.</p> <p>The minimum 250 hours/year requested in User Manual 2023 for permanent personnel is not requested for this call; this value can be lower and proportional to the foreseen activity.</p> <p>A2) not-permanent scientific staff in public institutions/universities or private no-profit can be reimbursed; not-permanent administrative staff can be paid only if included in the coordination activity, if the research unit is also the coordinator.</p> <p>Travel ARE INCLUDED IN E (lump-sum operating expenses) - for coordinator travels see point F.</p>						

B) Consumables

(in the online application form this item is included in „consumables and equipment“: please specify each amount in the finance comments).

C) External activities – advisory/consultant services, specialistic services supply (scientific, logistics for meetings, open access publications, equipment rental, etc.).

C1) consultants/professional job (IVA)

C2) Services

These costs (C1+C2) can not exceed 30% of the sum of the not-permanent personal (A2) + Consumable (B).

(in the online application form include this item C under „subcontracts“: please specify C1 and C2 amount in the finance comments).

D) Equipment – Only use cost (related to the project duration) for scientific equipment will be reimbursed.

(in the online application form this item is included in „consumables and equipment“: please specify each amount in the finance comments)

E) Lump-sum operating expense – The requested amount must not exceed 20% of the total costs for Personnel (A1+A2). In this item travel are included.

(in the online call application form lump-sum/overheads are split in different items. The Italian applicants are invited to only fill in the cell „overheads“ of the column „subcontracts“, reporting the total lump-sum operating expenses amount).

F) Coordination - If the Italian applicant is also playing the role of coordinator, the eligible costs are those indicated in the User's Manual 2023. Masaf will reimburse the coordination cost. This cannot be higher of the maximum amount allowed calculated on the total international project requested funding.

Please note: travels related to the coordination activity are included in the coordination costs.

No cost for project monitoring by an expert is foreseen, therefore this budget cannot be requested.

(in the online application form coordination cost has to be included in „subcontracts“: please specify each amount in the finance comments)

TO FILL THE ONLINE FORMAT CONSIDER THE BELOW TABLE OF CORRESPONDANCE

National document to be presented by Italian participants **before the proposal submission deadline**

Public entities/universities

No documents have to be submitted to Masaf.

No-profit private research bodies

Documentation stating their research mission (statute and/or articles of incorporation or memorandum of association, etc.) must be sent to the following PEC address:

aoo.cosvir@pec.politicheagricole.gov.it specifying in the object "Project acronym Bando AGROECOLOGY 2024 – ente privato no profit".

National document to be presented by Italian participants (beneficiaries) **after the final funding decision** (communication by Call Office to selected projects for funding)

Only after the official communication sent by the Call Office to the coordinators (expected by December 2024), Masaf DISR IV will formally request to each Italian U.O. of the projects selected for funding to fill in the national template, based on the User's Manual 2023. The template will be sent along with the letter indicating the approved budget amount and requesting to apply for the national grant. The template must be written in Italian and must follow the User's Manual 2023 rules and specific indications, if any, provided to the UO.

Correspondance between eligible costs (Masaf) and financial table submission system

Masaf item	Agroecology 1 st Call (financial table submission system)	Notes
A1 and A2 Personnel/Personale	Personnel	Personnel not reimbursed must be indicate as "own contribution" Details and figures in cost explanations
	Travel	Details and figures in cost explanations (travel costs are included in lump-sum – column "other" Table 2 Submission tool)

These organizations may apply but have to contact the National Contact Persons to approve eligibility and to get further terms and conditions.</p> <p>The subsidy is coming from the Ministry of Agriculture, Nature and Food Quality (LNV). The following conditions apply:</p>						

1) *For Wageningen Research (WR) and other TO2 institutes:*

The 'TO2 regeling' (<https://wetten.overheid.nl/BWBR0040605/2018-07-25>). and the tariff agreement under it apply.

2) *For other organizations and universities:*

De Kaderwet EZK- en LNV subsidies (<https://wetten.overheid.nl/BWBR0007919/2019-01-01/> - artikel 2a) applies.

Eligible costs are personnel costs for the performance of the project and direct costs such as materials, small scientific equipment, travelling expenses and other costs that can be justified as necessary to carry out the proposed activities. Projectmanagement can be maximum of 10% of the total projectcosts. Travelexpenses can be maximum of 5% of the total projectcosts.

After the project is granted in the transnational process the National contracting negotiations will commence to get the requested budget from the Ministry.

The proposed project must be beneficial to the national challenges and must have a clear added value to the national programme.

The Dutch participation should be in line with the knowledge and innovation agenda KIA Landbouw, Water, Voedsel (<https://kia-landbouwwatervoedsel.nl>) and other relevant policies on agroecology.

Projects on both themes are eligible. However If selection is necessary priority will be given to theme 1 (on farm) over theme 2 (landscape).

Any additional national/regional rules or documents or information						
<p>Specific eligibility rules applying for the Norwegian partners in the proposal</p> <ul style="list-style-type: none"> ▪ Only proposals which also are relevant for the context of Norwegian circumstances are eligible for funding. The Norwegian applicants are encouraged to make clear how this criterium is fulfilled. ▪ Only proposals based on terrestrial resources are eligible for funding. ▪ Sole proprietorships ("enkeltpersonforetak"), some farmers, e.g., are eligible as partners. However, payroll and indirect expenses will not be covered for the owner and the spouse. The payroll and indirect expenses for any other employees of sole proprietorships can be covered, as well as expenses relating to participation in a project, provided that they are described in the sole proprietorship's accounts. 						

- If the project is awarded funding, it is required to sign a **Consortium Agreement** before the partner(s) funded by RCN can receive funding.

General information:

For more information about RCN conditions for funding, please read: [General application requirements](#).

Support from the Research Council constitutes [state aid](#) when it is awarded to an "undertaking", i.e. an actor that carries out an economic activity consisting of offering products or services on a given market.

After funding decision, the Norwegian part of funded projects must **register through the RCN portal**. Further information will be provided to the relevant partners.

Reporting to RCN: <https://www.forskningsradet.no/en/financing/received-funding/project-reports/>

Eligible costs: Find information here: [What to enter in the project budget](#).

The budget applied for shall be stated in Euro. Conversion from Euro to Norwegian kroner is based on the official **exchange rate** per application date for preproposals. The official exchange rate can be found here: [Exchange rate \(InforEuro\) \(europa.eu\)](#)

Open access / Open science: The Research Council seeks to lead the way in making research as open as possible and as closed as necessary. The Research Council of Norway has stipulated requirements relating to self-archiving and open access to publications and research data produced in connection with R&D projects funded by the Research Council. Read more about The Research Council's Principles for [Open Science](#).

Additional Information

Any additional national/regional rules or documents or information						
Applicable regulation	Applications requesting funding from FCT under this call will be subject to <u>FCT Regulation on projects funded solely by national funds</u>, as amended by the Regulation no. 5/2024, of 3 January, hereinafter referred to as FCT Regulation, which amends and republishes Regulation no. 999/2016, of 31 October, and to other applicable national and EU legislation.					
Type of beneficiaries	For information on the type of beneficiaries eligible for FCT funding under this call, see Article 3 of FCT Regulation .					
Criteria of beneficiaries' eligibility	For information on the criteria of beneficiaries' eligibility, see Article 5 of FCT Regulation .					
Projects typology and areas to be supported	Theme 1 – Enhancing agroecology at the farm level Theme 2 – Implementing agroecology at the landscape level For complete information regarding projects typology and areas to be supported under this call, see pages 8-9 of the Call Text.					

Criteria of projects' eligibility	For information on the criteria of projects' eligibility, see article 6 of FCT Regulation .
Funding allocation to be granted and conditions	<p>FCT budget allocation for this call is 500 000,00 €.</p> <p>The maximum amount of funding to be requested to FCT by a consortium with a Portuguese Main Applicant is 250 000,00 €.</p> <p>The maximum amount of funding to be requested to FCT by a consortium with a Portuguese Project Applicant is 150 000,00 €.</p> <p>If more than one Portuguese applicant participating in the same international consortium applies for funding by FCT, the combined funding demanded by all the Portuguese applicants may not exceed the maximum financial threshold for proposals with a Portuguese Main Applicant (250 000,00 €) or with a Portuguese Project Applicant (150 000,00 €). Portuguese Main Applicants and/or Project Applicants in the same international consortium will therefore have to share the funding that will be granted by FCT.</p> <p>For information on funding rates, see no. 2 of article 7 of FCT Regulation.</p>
Limits to the number of applications to be submitted by the RC and the beneficiary	The maximum number of applications submitted or participated in by each Researcher in Charge, Co-Researcher in Charge or member of the research team, or by each beneficiary (Proposing Institution), is indicated on page 13 of the Call Text.
Rules and limits to the expense eligibility	<p>For the purposes of defining the budget, the terms defined in article 8 of FCT Regulation apply to eligible expenses and in article 9 to non-eligible expenses.</p> <p>Excluded from the range of eligible expenses are the salaries and other remuneration supplements of teachers, researchers and other staff with a previously established indefinite contract with the Public Administration.</p> <p>Expenditure on adapting buildings and facilities is limited to a maximum of 10% of the project's total eligible expenses.</p> <p>The project's indirect costs are based on the application of a flat rate of 25% of the direct eligible costs.</p>
Projects assessment criteria	For information on the projects assessment criteria under this call, namely the description of the assessment methodology and the minimum merit thresholds, see pages 19-22 of the Call Text.
Applicable forms of payment	In accordance with no. 1 of article 7 of the FCT Regulation , the funding to be granted to proposals requesting funding from FCT under this call is non-reimbursable and is based on real costs . As such it must be justified through invoices paid or other accounting documents of similar probatory value, under the terms of no. 5 of article 8 of FCT Regulation .
Elements to be sent by the beneficiary	For information on the elements that must be guaranteed by the participants in the consortium in order for the proposal to be submitted on the submission platform, see page 16 of the Call Text.
Additional information	FCT and CCDRC as Portuguese funding agencies on this call, reserve the right to evaluate the possibility of transferring application(s) to the other Portuguese funding agency if an application is considered non-eligible by the funding agency selected by the candidate institution, but is eligible by the other

	<p>Portuguese funding agency, which will from then on be responsible for managing the application(s). The transfer of applications will be carried out in accordance with the terms set out in the MoU signed between the parties.</p> <p>If FCT or CCDRC reach the limit of the budget that each of the agencies has set for funding projects under this call before the number of applications recommended for funding by each of these agencies has run out, the applications recommended for funding that lack funding may be transferred to the agency that still has the budget to fund applications. The transfer of applications recommended for funding will be carried out in accordance with the terms set out in the MoU signed between the parties.</p> <p>The percentage of time dedicated to transnational projects will not be added to the percentage of time dedicated to existing national projects.</p> <p>Statement of Commitment:</p> <p>Within 10 working days after the deadline for submitting the pre-proposal, a Statement of Commitment duly signed by the Researcher in Charge (partner and/or coordinators) and by the legal representant of the Portuguese Proposing Institution must be sent to marta.norton@fct.pt; pedromiguel.ferreira@fct.pt.</p> <p>The stamp or white seal of the Portuguese Proposing Institution will not be required on a digitally signed Statement of Commitment, as long as it is signed, in the Autenticação.gov application, with professional attributes that identify the functions performed by the signatory.</p> <p>Portuguese applicants of transnational consortia that <u>do not apply for funding from FCT do not need</u> to submit the Statement of Commitment to FCT.</p>

Indicative budget	500,000 €					
Maximum funding per project	The maximum funding for one project from the public budget is 250,000€ if Romania is the coordinator of the transnational project; The maximum funding for one project from the public budget is 200,000€ if Romania is partner in the transnational project..					
Project duration	Min. 24 months			Max. 36 months		
Themes and topics to be funded	all topics					
Exceptions for funding of the research topics based on your national priorities	n/a					
Link to funding programme and other relevant information	https://uefiscdi.gov.ro/parteneriate-si-misiuni-europene					
Following partners are eligible for funding:						
Universities	Research institutes	Non-profit organizations	Consumer/citizens	Civil society representatives	Private companies	Other
x	x	x			x	
others	Legal entities established in Romania are eligible to get funding, i.e. public and private accredited universities, national R&D institutes, other research organizations, SMEs, large industrial enterprises with R&D activity within their domains. We can fund only Romanian research teams. For universities, public institutions, R&D national institutions funding is 100%, and for SMEs and Large companies, financing is under the permit OMCID no. 21.324/02.11.2023 approving the scheme of State aid for Program 5.8: European and international cooperation.					
Any additional national/regional rules or documents or information						
The following categories of expenses are eligible:						
A. Staff costs (researchers, technicians and support staff, including all corresponding state and social contributions; these contributions are subject to national regulations in force);						

B. **Consumables** (materials, supplies or similar);

C. **Equipments** (in full compliance with state aid regulations), no more than 30% of the total funding from the public budget;

D. **Subcontracting** (max. 25% of the total funding from the public budget);

E. **Travel expenses** (in Romania or abroad, only for project teams' members);

F. **Overheads** (calculated as a percentage of direct costs: staff costs, travel expenses and logistics costs - excluding capital costs). Indirect costs will not exceed max. 25% of direct costs, excluding subcontracting. Expenses are eligible if incurred after signature of the contract.

To EU countries: no

To Non-EU countries: no

Subcontracting special tasks (i.e. IT services, etc): Yes, expenditure on services performed by third parties cannot exceed 25 % of the funding from the public budget. The subcontracted parts should not be core/substantial parts of the project work.

National regulation

Indicative budget	500,000 €					
Maximum funding per project	200,000 € for all Slovenian partners within one consortium					
Project duration	Min. 24 months			Max. 36 months		
Themes and topics to be funded	All topics					
Exceptions for funding of the research topics based on your national priorities	N/A					
Link to funding programme and other relevant information	https://www.gov.si/drzavni-organi/ministrstva/ministrstvo-za-kmetijstvo-gozdarstvo-in-prehrano/					
Following partners are eligible for funding:						
Universities	Research institutes	Non-profit organizations	Consumer/citizens	Civil society representatives	Private companies	Other
x	x	x				
Any additional national/regional rules or documents or information						
Eligible Institutions	<p>Research organizations as defined in the national Scientific Research and Innovation Activities Act (<i>Zakon o znanstvenoraziskovalni in inovacijski dejavnosti</i>). All participating institutions have to be registered in the Slovenian Research Agency register of research institutions (<i>Informacijski sistem o raziskovalni dejavnosti v Sloveniji - SICRIS</i>). Organizations that fulfill these requirements may be:</p> <ul style="list-style-type: none"> - universities, - public research institutes - private research institutes - non-governmental organisations - large, medium or small enterprises 					
Eligible Applicants	<p>All participating Slovenian researchers <u>have to be registered</u> in the Slovenian Research and Innovation Agency register of researchers (SICRIS) and must have available research hours.</p> <p>The project activities of each Slovenian partner have to be under the supervision of the <u>primary investigator/primary researcher</u> who fulfills the requirements for project leader as defined in Rules on criteria for establishing compliance with the conditions for being the head of a</p>					

	<p>research project (<i>Pravilnik o kriterijih za ugotavljanje izpolnjevanja pogojev za vodjo raziskovalnega projekta</i>) and Methodology of Call proposal evaluation (Metodologija ocenjevanja prijav na razpise).</p>
Eligible Costs	<p>MKGP will fund all eligible costs of successful Slovenian transnational projects, recommended for funding, in accordance with the Decree on the scientific research funding from the budget of the Republic of Slovenia (<i>Uredba o financiranju znanstvenoraziskovalne dejavnosti iz Proračuna Republike Slovenije</i>). Eligible costs are defined based on the FTE value according to the Slovenian Research and Innovation Agency's research project categorization (A, B, C or D based on the research conducted). Eligible costs must be directly related to the research conducted and mandatory include all the following categories as elements of the FTE:</p> <ul style="list-style-type: none"> - <u>personnel</u> (including social security, health, pension, and other contributions according to national legislation); - <u>material</u> (travel and meetings costs, consumables, dissemination and knowledge exchange costs, other costs); - <u>depreciation</u> costs. <p>Overhead or indirect costs are eligible. The value is calculated based on the FTE value of category A, B, C, or D research projects, under the condition that costs under each of the specific FTE elements are appropriately decreased (by a max. of 25% for indirect costs). Providing the stipulated conditions are met, the Public Procurement Act (<i>Zakon o javnem naročanju</i>) applies.</p> <p>Up to 100 % of eligible costs can be funded for research organisations (universities, public and private research institutes) whose financed activity is non-economic in accordance with the provisions of Communication from the Commission Framework for State aid for research and development and innovation. Wide dissemination of all research results on a non-exclusive and non-discriminatory basis is required.</p> <p>Maximum funding percentages for applied research:</p> <ul style="list-style-type: none"> - Universities and research organisations 100 % - non-governmental organisations 100 %
Additional criteria	<p>eligibility</p> <ul style="list-style-type: none"> - Eligible type of research and TRL: basic and applied – for Slovenian partner eligible TRL range is 2-6. The type of research conducted by Slovenian researchers must be defined and explained in the project proposal (e.g. in the Comments on budget section). - Period of eligibility of expenditures on the project: From the starting date of the transnational project stipulated in the consortium agreement for a period of 36 months, with a prescribed additional 30-day period for the payment of invoices related to the project costs. The period of eligibility of expenditures on the project can only start from the date the national contract enters into effect. The exact duration of the project will be defined in the contract between MKGP and the selected Slovenian partner. - Period of eligibility of public expenditures: Budgetary years 2025, 2026, 2027 and 2028.

Any additional national/regional rules or documents or information						
<p>Eligible organizations</p> <p>Universities, research institutes, private companies, private and public organisations that engage in economic activity, public authorities, and NGOs. State aid rules apply when Formas provides grants to companies and other organisations engaged in economic activity. The applicant must be a Swedish legal entity.</p> <p>Specifications: Economic activity is generally defined as any activity consisting in offering goods or services on a given market. If an organisation falls in the economic activity category, then state aid rules apply.</p> <p>Please find more information on State aid rules below!</p> <p>Eligible applicant</p> <p>The main applicant in the Swedish project group does not need to be a researcher with a PhD, or from a research-performing organisation.</p>						

However, at least one partner in the Swedish project group must have a PhD and be employed by a research-performing organisation.

Eligible Costs

Formas' standard eligibility criteria apply. Please see Formas' general instructions: [How it works - Formas](#) VAT should not be included in the budget figure.

Please note that all costs must be submitted in Euros (EUR) in the international submission platform for both pre and full proposals, and in Swedish crowns (SEK) in the Swedish submission platform Prisma if invited to submit a full proposal at the second stage. Use the historic exchange rate (EUR to SEK) from the date when the first step for pre-proposals close. The exchange rate used must come from Sveriges Riksbank ([Sök räntor och valutakurser | Sveriges Riksbank](#))

Additional Information

It is a transnational eligibility requirement of this call that applications are written in English. You should write the application in English since the expert panel consists of international reviewers. Swedish applicants are also able to provide an additional Swedish version of their application. For additional applications, or parts of applications written in Swedish, these can be translated by professional translators into English. In such cases, it will not be possible for applicants to view or make linguistic adjustments to the application after it is translated and submitted to the expert panel for assessment.

All scientific publications resulting from projects funded by Formas must be published using immediate open access (OA).

Swedish applicants who have submitted a pre-proposal to the AGROECOLOGY Partnership (the international submission platform) and are invited to submit a full proposal at the second stage, will be contacted by Formas for further information on how to register their full proposals with Formas' system Prisma.

Swedish applicants in the same project consortium must apply in Prisma under one single project application after they have been invited (full proposal).

Project duration is 3 years.

Reports are to be submitted according to the regulations of both the AGROECOLOGY Partnership and FORMAS.

Additional information on state aid rules

The provisions enabling Formas to provide funding to organisations are contained in the Swedish Government's Regulation (2017:195) on state aid for research and development and innovation in the environment, agricultural sciences and spatial planning. It is based on the European Commission's General Block Exemption Regulation (GBER) 651/2014 Article 25. Further information is provided via the links below:

- [Terms and Conditions for Grants - Formas](#)

- [State aid regulations – for private and public organisations that engage in economic activity – Formas](#)

Applicants who would be receivers of state aid, in case funding is approved by Formas, need to be aware that the legal requirements for transparent reporting of state aid have been changed in 2023. This means that approved state aid which amounts to 100 000 euro or more to one Project Party (or if the project concerns primary agriculture sector or fishery and aquaculture sector 10 000 euro), must be reported openly within the EU. Formas is responsible for this reporting. Those who submit an application are considered to be informed about this requirement of reporting and are considered to approve that this reporting will be made above the legal thresholds.

Applicants engaged in economic activities are strongly advised to find the latest updated information on state aid rules on Formas' web page. [State aid regulations – for private and public organisations that engage in economic activity – Formas](#)

Funding rates

For an explanation of the numbers within brackets, see (in Swedish): [tabell för Stödnivåer Formas stödförordning.pdf](#).

Maximum funding percentages:

Organisation type	Basic research	Industrial research/Applied Research	Experimental development/Innovation
Large Enterprises (GBER) Article 25	100%	50% (65%)	25% (40%)
Medium Enterprises (GBER) Article 25	100%	60% (75%)	35% (50%)
Small Enterprises (GBER) Article 25	100%	70% (80%)	45% (60%)
Universities, public research organisations Public authorities	100%		
Associations without economic activities, NGOs	100%		
Associations* with both economic and non-economic activities, who apply for aid only for non-economic activities	100%		

*Such applicants must be aware, that if the funding is used in the economic activity of the association, funding will be reclaimed in full with interest.

Please consult the "State aid regulations" webpage for details and documents regarding these funding rates. [State aid regulations – for private and public organisations that engage in economic activity – Formas](#)
